

Product specification list

Reference entries for brand review and specification discussion. Not a confirmed Nerivanta supply catalogue.

TECHNICAL STATUS - Values below are unverified reference data. No entry establishes product availability, regulatory approval or fitness for a particular application. Resolve the specification against approved technical files before release.

API reference entries

Reference entry	Composition / stated value	Format
Icosapent ethyl	96.5%	EE
EPA concentrate	96.5%	Concentrate
Omega-3 acid ethyl ester	90%; EPA 430 mg/g; DHA 347 mg/g; total omega-3 900 mg/g as EE	EE
Injectable reference / 28%	EPA 13%; DHA 9%; total omega-3 28%	Route to verify
Injectable reference / 40%	EPA 13%; DHA 14%; total omega-3 40%	Route to verify

Nutrition reference entries

Reference entry	Composition / stated value	Format
18/12 fish oil	EPA 18%; DHA 12%	TG
33/22 fish oil	EPA 33%; DHA 22%	EE
50/20 fish oil	EPA 50%; DHA 20%	EE
DHA algal oil	Grade and DHA concentration to be specified	Algal oil

Regulated and injectable entries are included only for source-data review. They are not a statement of authorization, clinical suitability or commercial availability.

Application & project brief

The remaining reference categories and the information needed for a product-specific review.

Category	Reference entry	Points to define
Animal nutrition	Feed-grade fish oil	Fatty-acid profile, freshness and application.
Animal nutrition	Omega-3 feed oil blend	Blend composition, handling and intended use.
OEM	Omega-3 softgel project	Formula, capsule, packaging and release criteria.

Build a complete enquiry

01 / Product definition

Identify the ingredient, composition, molecular form and destination market. Define the applicable standard rather than relying on a product name alone.

02 / Analytical acceptance

State the required assay and limits for oxidation, contaminants and microbiology, together with methods and reporting units.

03 / Supporting evidence

List the specification, COA, TDS and SDS needed for assessment. Identify any certificate or regulatory file that must be checked for the exact product and site.

04 / Commercial planning

Provide expected demand, sample quantity, packaging needs, delivery timing and storage conditions.

RELEASE CHECK - The numerical entries have not been independently verified. Reconcile any differences between webpage data, reference PDFs and current technical files; do not average values or treat them as interchangeable.
